Business Insights

• Total revenue generated from the dataset is 830,300.00.

• Total profit is 168,260.00 with an estimated margin of 20.26%.

• Total recorded quantity is 629 units.

• Top performing product based on sales is 'Laptop'.

• 'Mouse' is currently one of the weakest products by sales.

Growth Recommendations

• The business has a healthy margin. Consider scaling the highest-performing products and regions.

• Focus marketing campaigns and inventory availability on high-performing products.

• Use quantity and sales together to identify high-volume products and optimize inventory.

• Use customer segmentation and targeted offers to improve repeat purchases and customer lifetime value.

• Monitor monthly sales and profit trends to detect growth opportunities and early performance decline.
